Pool Dreams

Luxury

polyfaser®

You can tell true style straight away

Luxury is not always associated with overindulgence in material prosperity. Life gets faster and faster and time seems to slip away. That's when you start to long for peace and equilibrium. Feeling comfortable at home, reading a book, enjoying the company of loved ones, swimming a few laps in your own pool. Using our products, we want to ensure that you enjoy this kind of luxury to the fullest.

Close your eyes and surrender to utter relaxation

It is our meticulousness and uncompromising workmanship, even when it comes to the minor details that make swimming pools from Polyfaser truly exceptional. We have developed smart solutions to offer you and your family a wide variety of ways in which to relax. Sophisticated steps ensure ample room to move about, loungers let you relax in shallow water, massage jets stroke your skin and revitalise your muscles. The best temperature for your well-being is between 25 and 28 degrees. So there's only one down side to it all: the thought of having to get out again.

Family

polyfaser®

The pool that can cope with any requirements

Togetherness is true prosperity. Getting together with loved ones you want to spend your most precious time with in the comfort of your own garden. Demands are high but with a swimming pool, deciding where to spend your leisure time is easy. For everyone at any age, the pool is a place that meets all your needs. Children and adults can satisfy the urge to exercise or to do nothing at all, side by side, spending as much time together as you like.

Harmony in gentle curves

The soft, rounded shapes combine agility and harmony. The integrated steps accompany you elegantly into the beautiful water, which slowly envelops your body until it absorbs you completely. Pool seating offers a place to relax, something you've been dreaming of for so long. At the touch of a button, the massage lounger begins to bubble, reviving your stiff back and weary legs. An experience you deserve.

Optional full insulation available for all models.

Ibiza 60

Roman steps, reinforcing steel frame

Korsika
3.77 x 9.00 x 1.50 metres
Roman steps, reinforcing steel frame

A big feature for a big garden

Regardless of your reasons for buying a swimming pool, with our extra large pools you will discover a completely new experience: the joy of swimming. That's because our giants of the one-piece pools offer plenty of space on all sides. At any rate, preparation for a counter-current system is also optional, you just never know. Once again, pool seating also provides the perfect place to relax.

All models come with a support edge for a cover roller and insulated floor, with optional full insulation

Karibik
4.00 x 10.20 x 1.50 metres
Roman steps, seating
(optional massage lounger)
child step,

(optional massage lounger),
reinforcing steel frame

Kos
4.00 x 10.50 x 1.50 metres
Convenient wide steps,
built-in starting block,
reinforcing steel frame

Appreciate the special touch

If you enjoy the comfort of a larger pool, you should take a look at the variety of entry stairs available to you. Not only should they visually complement your garden and surroundings, they should also make entering the pool a harmonious experience. After all, it does mark the start of your swimming session or relaxing break. You will feel an all-round sense of well-being if it all fits together perfectly. Both of these pool shapes extend the range of shapes and entry options in line with the wishes of our customers.

Optional full insulation available for all models.

Florida

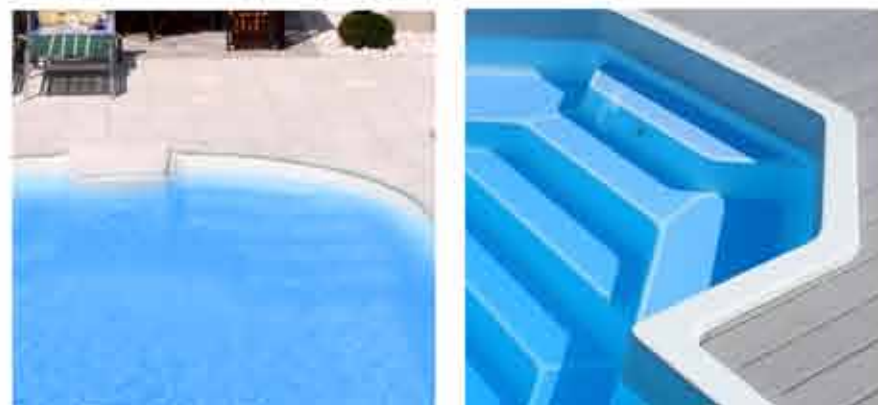

3.77 x 8.30 x 1.50 metres
Built-in steps, 2 loungers (optional massage loungers), support edge for a cover roller, reinforcing steel frame, insulated floor

Adria 85

3.80 x 8.50 x 1.50 metres
Built-in steps, 2 loungers (optional massage loungers), reinforcing steel frame, insulated floor

It's a clean thing

Your swimming enjoyment remains unspoilt – just like the water. Moreover, the cost of heating is effectively reduced as the heat in the water cannot escape. The installation of a cover is fundamentally possible on all of our one-piece pools; in some of our models the box for a cover roller is already incorporated. With this system, the cover roller in this roller box makes virtually no noise and is also pleasing to the eye.

All models come with insulated floors; full insulation optional.

Madeira

3.75 x 9.95 x 1.50 metres
Roman steps, support edge for a cover roller, child step, reinforcing steel frame

Samos

3.64 x 8.88 x 1.50 metres
Roman steps, seating (optional massage lounger), support edge for a cover roller, child step, reinforcing steel frame

Malta

3.77 x 9.00 x 1.50 metres
Built in steps, support edge for a cover roller, reinforcing steel frame

Teneriffa

4.00 x 10.20 x 1.50 metres
Roman steps, seating (optional massage lounger), support edge for a cover roller, child step, reinforcing steel frame

Freedom of design, shape and size

For us, no challenge is too great. When it comes to the shape, size and depth of your pool, we focus on your particular needs. We can make just about any imaginable landscaped pool concept a reality. Indoor pools are now a must for any elegant wellness area, especially in hotels. Right from the planning stages, we can offer our knowledge and support using technical drawings. Our tips will reduce the on-site work; we are even available once the job is complete for all your care and maintenance needs. Combinations of corners and curves, different water depths and the construction of various additional features, we'll be by your side from planning to completion.

There are no limits to realising your dreams:

- Our pools are constructed using a modular system which is why we can offer such a great range of shapes
- Every convenient size is possible, up to Olympic pool size
- Every depth can be produced, from children's paddling pools to plunge pools
- Overflow systems come as standard with hotel pools and communal facilities
- Various steps and entry options possible on every side
- A wide variety of features and attractions to ensure a unique pool landscape
- Delivery of all pool accessories
- Basically all the advantages of a monoblock system

Fast and precise

We keep the installation time of a pool to a minimum. We can guarantee this thanks to our reliable team of long-term employees. Our skilled advisors will support you throughout the planning stages and help keep costs as low as possible.

1) The excavation and insertion of concrete slabs are arranged by a contractor or the customer.

2) The shell is delivered by the company's flat-bed trailers with a guaranteed delivery time.

3) Our high-tech vehicles have no problem unloading, even when access is cramped.

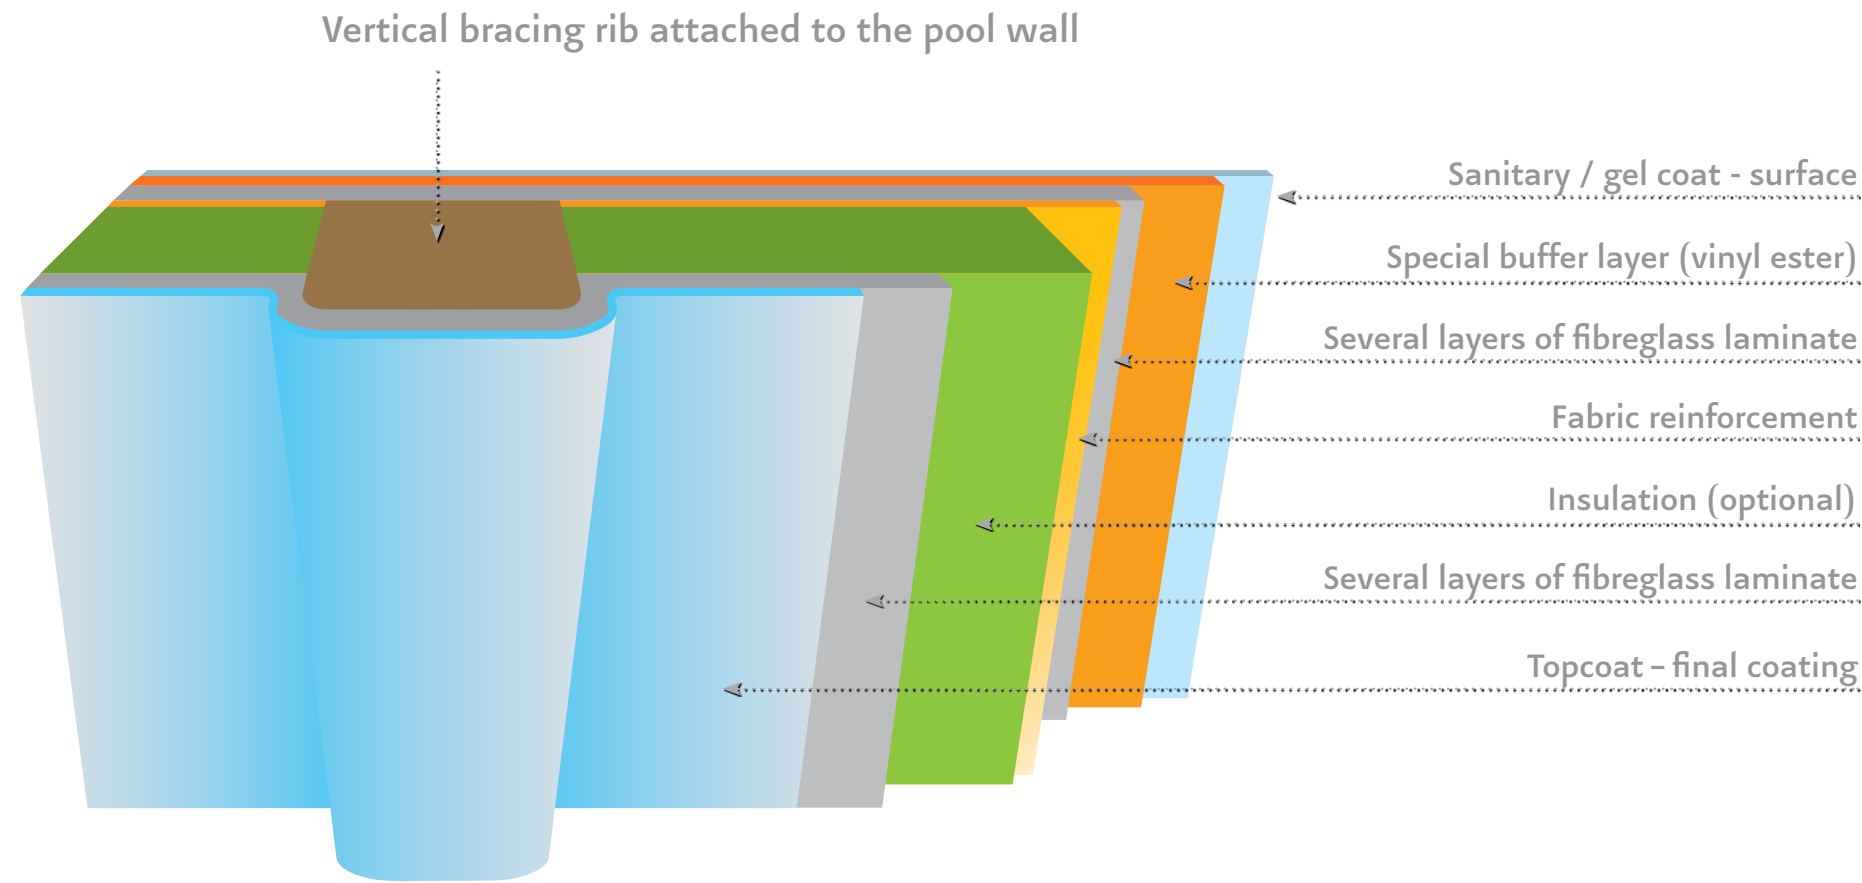

4) The mobile crane hoists the pool accurately into the excavation pit.

5) The steps are adjusted, pipes laid and the filter system installed. Our unique anchoring technique saves time and any additional costs - a great advantage in installation.

6) The pool is backfilled. The area around the pool can then be designed individually from wood, concrete etc.

Utmost precision is our promise to you

Seven good reasons for quality

We act out of conviction and tradition. The use of top quality materials and the utmost reliability in customer care has always been our guiding principle. Our pools are made up of 7 layers of different materials.

The workmanship is what makes us stand out from other comparable products. In our factory, each individual layer of the pool production is applied by hand. This guarantees uniform material thickness and, in particular, greater stability than machine production. Hardening takes place in heat chambers, which increases the life of the pool. A number of vertical bracing ribs are incorporated into the wall construction, thus ensuring extra high rigidity. The pool head is reinforced with a fully integrated steel girder, which also provides lasting strength. Special floor insulation protects against loss of heat below. The top layer of the pool is smooth for ease of cleaning.

A great installation advantage is offered by our unique anchoring technique, which allows the straightness of the walls to be adjusted perfectly. Assembly is carried out by our own skilled employees, who work according to schedule. Where necessary, more hands can be brought in to speed up installation. A flexible team of experienced service technicians guarantees continuous support. Regardless of the type of service, we are available to help quickly and reliably should you need us. Our products are subjected to rigorous quality control measures both in-house and under external supervision. This assures our customers the highest quality.

Certified quality for 40 years.

The guarantee for top quality and reliability

Polyfaser means quality down to the last thread. This was the topmost priority of company founder Josef Wagmeister, who set up our company with great enthusiasm back in 1968. Since then, our family business has been producing GRP elements using a manual lamination process with polyester resins and glass fibres. This means real craftsmanship, which notably distinguishes our products from the rest.

More than 100 skilled professionals work on our premises over an area of 30,000 m2 to produce top quality one-piece pools, modular pools, swimming pool covers and steam baths. Ongoing research into new material components secures our leading position in the manufacture of high quality swimming pools for private and commercial use.

Deviations in the structure and materials used as well as production-related dimensional discrepancies of the models shown are possible due to technical requirements.
