 **HAYWARD®**

**RS2 VSTD variable
speed pump**

Unrivalled energy efficiency. For over 40 years this pump has been the reference in pool pumps: it is all purpose, efficient and reliable. The variable speed model combines the qualities of the other versions with exclusive leading edge technology.

Advantages:

- Four (dry contact) digital inputs to hook up peripheral equipment such as a robotic cleaner, heat pump, or roll-up pool cover
- Improved drive with added features
- Very silent
- Low energy consumption
- Efficient
- Easy to install
- For new builds and refurbishment

Integrated, easy-access controller with touch buttons to display information in real time.

5 possible daily speed changing.

Skimming Function (Programmable), Auto change to 3 speed every 3 hours for 0 to 30 minutes.

RS2 VSTD variable speed pump

ECONOMICAL

A Hayward® variable speed pump is a winner economically. Running your filtering 24 hours a day makes it possible to have a reduced flow rate thereby making an average 75% saving on your electricity consumption. A variable speed Hayward® pump has a payback of 3 seasons thanks to the savings it makes possible.

PERFORMANCE

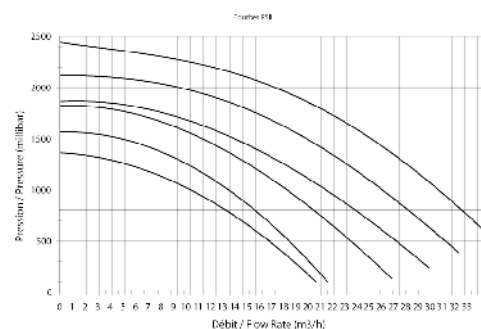

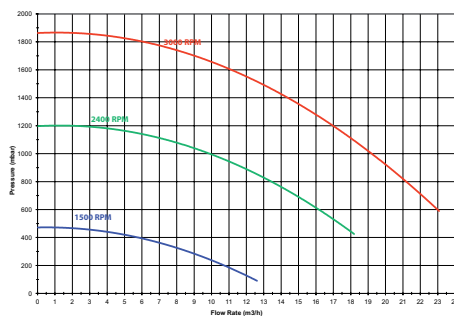

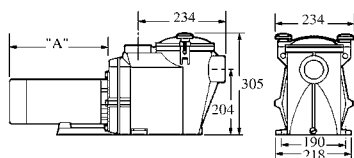

- A synchronous permanent magnet motor with AC electronic switching makes significant energy savings.
- The pumps run more slowly for filtering giving great acoustic comfort. High speeds are only used for counter-washing or very specific applications.
- When a customer has other equipment such as a chlorinator or a heat pump, the variable speed pump optimises the effectiveness of the treatment or the water heating thanks to its 24*7 operation.

ALL PURPOSE

The RS2 VSTD model pump seamlessly replaces a prior version of the Super Pump.

EASY TO USE

Built-in control unit with touch buttons to display data.
